

PUREPRO® SAFETY VALVE & SPIN-ON FILTER

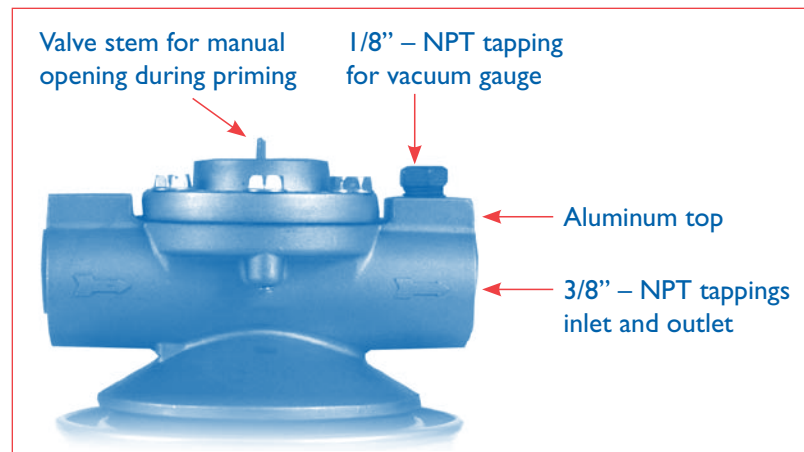

S226W Suntec PRV-38P Safety Valve with PurePro FI00-10W Spin-On

- *Epoxy coated & UL listed*
- 1/8" NPT tapping for vacuum gauges and bleeding
- Cast aluminum top
- Seamless one piece canister (drawn steel)
- Plated steel end caps (media embedded in thermo setting adhesive)
- 10 Micron filter media
- Perforated metal center support tube
- Spring pad (no metal to epoxy contact)
- Nitrile gasket (prevents swelling) for easy removal of element

Suntec PRV-38P

When the burner turns on, the pump creates vacuum pulling the valve stem indicator down, thus opening the valve. When the burner shuts off, if the vacuum is broken, or if there is a leak between the PRV-38 and burner, then the valve stem indicator pops out, closing the valve to prevent unwanted siphoning.
